Manvi Gupta   🔗

I'm Manvi Gupta, a passionate BTech Computer Science student specializing in Cloud Computing, currently in my 3rd semester(2nd year). With a strong foundation in programming languages like Python, Java, and C++, I have a keen interest in solving complex problems, especially through Data Structures and Algorithms, which I've mastered using C++. My research on "The Impact of Blockchain on Healthcare" reflects my enthusiasm for exploring cutting-edge technologies, particularly decentralized systems. I've also worked on Python and SaaS-based projects, where I applied my technical skills to create meaningful solutions. Being multilingual in Hindi, English, and German helps me connect with diverse communities, and I'm always excited to collaborate and grow in this dynamic field.
